Education

Bharati Vidyapeeth Institute of Computer Applications and Management

New Delhi, India

Master of Computer Applications (MCA); GPA: 9.28

2024 – 2026

University of Mumbai

Mumbai, India

B.Sc. in Data Science and Business Analytics; GPA: 9.3

2020 – 2023

Experience

Software Engineer – Global Data Operations Intern

Jun 2022 – Jan 2023

Dun & Bradstreet

Mumbai, India

- Automated cloud-based FDI & MCA data pipelines using Python and SQL, cutting processing time from 10 days to 1 day while improving pipeline efficiency.
- Deployed automation on Microsoft Azure with cloud storage, scheduled jobs, and CI/CD, ensuring daily T+1 client deliverables with 100% uptime.
- Developed RESTful APIs and web scraping frameworks (BeautifulSoup, Selenium) for FDI and UDYAM portals, improving data accuracy by 30% and saving 150+ analyst hours.
- Built microservices linking Insolvency and Bankruptcy data with DUNS IDs to enhance data traceability, scalability, and reporting accuracy.
- Collaborated using Git, IntelliJ, and Agile practices; applied Test-Driven Development (TDD) and Java OOP principles for robust code quality.

Projects

Ayurveda E-commerce Platform [\[Link\]](#) | *Next.js, Node.js, PostgreSQL, AWS, OAuth 2.0, Razorpay*

- Developed and deployed a full-stack web app on AWS Cloud for Ayurvedic products with authentication, payments, and admin management.
- Built RESTful APIs using Node.js and Prisma ORM; optimized SQL queries improving response times by 35%.
- Implemented OAuth 2.0 authentication and role-based access control ensuring secure onboarding and cloud scalability.

PrepWise – AI Mock Interview App [\[Link\]](#) | *React.js, Next.js, Firebase, Speech API, Tailwind CSS*

- Built an AI-driven React.js app for voice-based Q&A using Vapi AI and browser Speech API, with real-time feedback and dynamic question modules.
- Integrated Firebase Auth and Firestore for secure login and persistent cloud data storage; deployed via Vercel CI/CD for agile delivery.

High-Performance Multi-Threaded Server [\[Link\]](#) | *Java, Concurrency, Thread Pools, JUnit*

- Engineered a Java-based server handling 1M+ concurrent requests using multithreading, concurrency, and OOP principles.
- Applied Test-Driven Development (JUnit) and JMeter benchmarking to improve latency and throughput by 40%.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, Python, C

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Spring Boot (Familiar)

Backend & Databases: REST APIs, PostgreSQL, Prisma ORM, MongoDB, SQL Optimization, Snowflake (Basic)

Cloud & Tools: AWS (EC2, S3, Lambda), Azure, Docker, Git, GitHub, IntelliJ, VS Code, CI/CD (Vercel, GitHub Actions)

Core Concepts: OOP, DSA, Concurrency, Multithreading, TDD, Agile Development

Achievements

- 1st Place – Dark Coding Competition (IEEE BVICAM)
- 'WOW' Award – Dun & Bradstreet for impactful automation scripting
- Led Code Avengers event under NSC at BVICAM
